

eDynamic is a Global, end-to-end Web Solutions & Strategy Consulting Firm

eDynamic is a Global, end-to-end Web Solutions & Strategy Consulting Firm with deep expertise in Web technologies, Web 2.0 Strategy, Interactive Design, Marketing & Managed Services.

Overview

eDynamic is a Global, end-to-end Web Solutions & Strategy Consulting Firm with deep expertise in Web technologies, Web 2.0 Strategy, Interactive Design, Marketing & Managed Services. Key operational services span to Application Development & Management, Interactive Strategy & end customer acquisition & retention with a focus on delivering integrated business solutions. Launched in 1999 as a subsidiary of DSS, a large HR agency, eDynamic is a rapidly growing, privately held firm that delivers on the technology, creativity & marketing needs of enterprises across multiple industries.

Challenge

The demand and challenge for eDynamic was multi fold and was arguably looking for the best hosting partner with real high performance and support. eDynamic needed a high value, fully outsourced hosting solution for its unique web related e-business solutions. A full featured dedicated hosting technology to power the next generation web services was the core demand faced by eDynamic

Solution

eDynamic contracted ZNetIndia.com to deploy, migrate, and manage a new hosting infrastructure in ZNetIndia.com datacenter. The system included advanced performance and high availability features and an expert technical team to assume and support all network and application duties. eDynamic host with Dedicated server of Single Processor Multi Core Windows with Single Processor Dual Core Pentium D 930 - 3.00GHz

Key Benefits

- Increased operational efficiency and reduced costs by outsourcing hosting requirements completely.
- Provided with secure database backup
- Installed secure and advanced web applications
- Provided with fast and reliable technical support service

- Faster & Efficient application usage and deployment
- Accommodate increased load on the website and server scalability
- Ensures the integrity of the system and quick data recovery
- Improved server accessibility & availability
- Developed application tools at relatively lower infrastructure costs
- Getting round the clock 24 / 7 support for all rising issues
